SUMMARY

ISTQB Certified Quality Engineer with 1+ year of experience at IBM, transitioning into a Python Developer role. Hands-on experience in building backend applications using Python, Flask, SQLite, and REST APIs, combined with strong foundations in API testing, debugging, and software quality assurance. Passionate about backend development, data persistence, and writing clean, modular, production-ready code.

EXPERIENCE

Quality Engineer

IBM

October 2024 - Present, Chennai

- Designed and executed test cases for a banking web application covering functional, regression, and UAT scenarios.
- Identified, logged, and tracked defects using JIRA, working closely with developers to ensure timely fixes.
- Performed API testing using Postman, validating request payloads, response structures, and HTTP status codes.
- Conducted mobile and cross-browser testing using Sauce Labs to ensure application stability across devices.
- Collaborated with globally distributed teams in time-critical environments to meet delivery timelines.

PROJECT

Banking Backend API System (Python | Flask | SQLite | REST APIs)

- Developed a Flask-based backend application for customer and account management.
- Implemented APIs for customer creation, account creation, deposits, withdrawals, balance checks, and transaction history.
- Integrated SQLite for persistent data storage with proper table relationships and foreign keys.
- Added input validation, error handling, and meaningful HTTP status codes for reliable API behavior.
- Structured the application using Flask Blueprints for modularity and maintainability.

LeetCode Progress Tracking System (Python, Flask, SQLite, REST APIs, SQL, Git, Postman)

- Built a Python Flask-based REST API with SQLite to persistently track LeetCode problems, including problem number, name, difficulty, topic, notes, and solved date.
- Implemented RESTful CRUD endpoints with JSON request/response handling and query-based filtering by problem number and name.
- Tested and documented APIs using Postman, and followed best practices such as virtual environments, `.gitignore`, and version control with Git & GitHub.

EDUCATION

Master of Computer Applications (MCA)

Amrita Vishwa Vidyapeetham • Mysore • 2024

M.Sc. Ocean & Atmospheric Sciences

University of Hyderabad • 2022

B.Sc. Physics

Christ College • Irinjalakuda • 2020

CERTIFICATIONS

ISTQB Certified Tester – Foundation Level (CTFL)

SKILLS

Programming & Backend: Python, Flask, REST APIs, SQLite, SQL

Testing & QA: Manual Testing, Functional Testing, Regression Testing, UAT, API Testing (Postman)

Tools & Platforms: Git, GitHub, JIRA, Agile/Scrum

Concepts: API Design, Input Validation, Error Handling, Modular Architecture
